

Vikram Anantha

US Citizen | Ann Arbor, MI | 781-995-7110 | markiv@umich.edu | [linkedin.com/in/vikramanantha](https://www.linkedin.com/in/vikramanantha) | vikramanantha.github.io

Education

University of Michigan

Aug. 2024 – May 2028 (expected)

B.S. Computer Science & Electrical Engineering, 1931E Scholar

3.96/4.00 GPA

- Relevant coursework: Machine Learning, Computer Vision, Data Structures & Algorithms, Digital Circuits, Computer Organization, Linear Algebra, Discrete Math

Experience

Software Eng. Intern

Jan. 2025 – Present

Capoom

Ann Arbor, MI

- Architected an automated pipeline for 3D Gaussian Splat model creation of UofM's Mcity
- Implemented hierarchical methods to visualize Gaussian Splat map

Research Scientist

Aug. 2024 – Present

University of Michigan, ROAHM Robotics Lab

Ann Arbor, MI

- Creating a real-time 3D object segmented model of a changing env. in Gaussian Splat for robotic arm movement
- Developing new Transformer-based Vision Language Action models to create faster generalist robot policies

ADAS Functional Integration Eng. Intern

May 2025 – Aug. 2025

Stellantis

Auburn Hills, MI

- Deployed a CAPL script to diagnose CAN-bus anomalies, identifying a 10% vehicle-component fault rate
- Designed and validated MATLAB Simulink model to control CAN-bus signals of vehicle to quantify the self-driving feel

Software Eng. Intern

Jun. 2024 – Aug. 2024

Constant Therapy Health

Newton, MA

- Developed Automatic Speech Recognition model for stroke aphasia patients & web-based hierarchical task visualizer
- Reduced false negative rate by 4x compared to Google's Speech Recognition Engine

Co-Founder, Teacher, Developer

Apr. 2020 – May 2024

HELM Learning

Lexington, MA

- Created free online peer-to-peer worldwide learning platform with over 4.2K students, 90+ classes
- Created services with Python, JS, SQL, Recommendation ML Algorithm, hosted platform on AWS

Research Intern

May 2023 – Feb 2024

Columbia University, Center for Smart Street Scapes

New York City, NY

- Worked on NSF Project, developed app to warn pedestrians at road intersections of oncoming vehicles
- Reduced latency to μ s for human reaction time to prevent accidents using React Native and MQTT messaging

Research Intern

Jun. 2023 – Sep. 2023

MIT, Auto ID Lab

Cambridge, MA

- Worked on 2FA system to prevent hacking for auton. vehicles on roads with YOLOv8 Vision model and Python

Technical Skills

Programming Languages: Python, C/C++, Java, JavaScript, HTML/CSS, CAPL, ReactJS, Assembly, Bash, LaTeX

Frameworks & Tools: Robot Operating System (ROS & ROS2), Amazon Web Services (AWS), Vector CANalyzer, MATLAB/Simulink, OpenCV, TensorFlow/PyTorch, Git/GitHub, CUDA, Docker, Gaussian Splatting, LLMs, YOLOv8 Object Detection, SAM-2 Segmentation, SLAM

Selected Honors & Awards

Immerse The Bay Hackathon, Stanford University, 1st Place Winner

Nov 2025

1931e Merit Scholarship, University of Michigan, 1 of 6 recipients

May 2025

American Invitational Mathematics Exam (AIME), 2 Time Qualifier

Mar. 2021 & Feb. 2022

USA Coding Olympiad (USACO), Silver Division

Dec. 2019

Publications

Digital Twin for Pedestrian Safety Warning at a Single Urban Traffic Intersection

2024
